Dear Ceta Form friend,

Two years of careful product development and optimization work and finally we have got it — our 2020-2021 catalogue.

Through 288 pages, which is more than ever, we showcase our innovations and hand tool expertise to you. This work is the result of our engineers' strong will to develop ground-breaking tools in close interaction with users. Outstanding performance, problem-solving tools with a premium user experience is your guarantee.

The story of Ceta Form which started in a small workshop 45 years ago, now goes on as a brand preferred in prestigious MRO locations, garages and factories around the world. A far-reaching brand sought for in more than 45 countries. We owe this success to our passionate team and the strong partnerships we have forged with our customers.

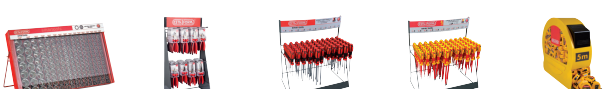

Keep watching Ceta Form, one of the fastest growing hand tool brands in Europe.

With Best Regards
Cemil Tayman — CEO

WHY CETA FORM

Comprehensive Product Range

Our offer encompasses 4.000 lines in 15 product families. Thanks to the breadth of our range, we help our customers to operate with less suppliers and reduce their operating costs. A one-stop shop for hand-tools.

Innovative Company

Ceta Form is an innovator. We are constantly introducing new products with outstanding features to our range, in order to provide added value for the end-user.

Product/Packaging Design

Ceta Form is a leader in the area of product design. Our tools are a perfect blend of functionality and aesthetics. Once customers experience the added efficiency from a good design, they stick with Ceta Form for life. Our packaging concept is also in-line with our tools: convincing, lean and clear.

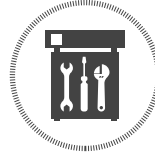

Quality Manufacturer

Ceta Form is an ISO 9001 certified manufacturer. We use the highest quality materials and employ modern equipment in our production, utilizing strict quality controls in all critical processes. Result: our return ratio is less than 0.5%.

Logistics

Almost every product listed in our catalogue is available ex stock in our warehouse. This enables us to make rapid deliveries from our stock with a very high percentage fulfillment rate.

POS Display Solutions

We provide high-impact display systems for point of sale. We make it easier for the consumers to understand and purchase Ceta Form products – ultimately increasing your revenue per sqm.

In-Depth Training Programs

We believe that tailoring training programs to suit our customers is the key to in-depth product knowledge. Training programs can be run either in our own factory which is equipped with modern training facilities or our customers' premises.

Sales Support Department

Our experienced staff are here to respond to all your questions/queries. We treat all of our customers as we would our friends. We want to make working with Ceta Form a pleasure, a partnership for life.

STRONG PRESENCE IN INTERNATIONAL FAIRS

New Roller Cabinets

The ultimate in tool storage

GTMAX

We believe the ultimate in hand tools deserves the ultimate in tool storage. Therefore after endless hours, weeks and months of research and many user interviews we have developed the new GT-MAX roller cabinet series.

Experience the new dimension in tool storage by yourself.

SAFE

Three-staged locking system prevents tilting, unintentional opening of drawers and secures the tools.

VERSATILE

6, 7 or 8 drawers? Standard body or Jumbo body? Your preferred color configuration? All possible in the GT-MAX range.

ADAPTABLE

Euro perforated side wall and a large range of accessories allow for a totally custom-built cabinet. CFS tool module system for the final touch.

TOUGH

Torsion resistant profile construction from heavy gauge steel and plastic protection on all corners against impacts.

New Adjustable Wrenches

Professional quality adjustable wrenches with extra wide jaw opening

SLIM

The slim and tapering design of the jaws makes it very easy to access restricted areas. Thanks to the premium material selection, the jaws are still very durable despite compact dimensions.

ERGONOMIC

The softgrip ergonomic handle allows for a good grip and ensures fatigue free working for long hours.

EXTRA-WIDE

Extra-wide opening capacity makes it possible to work with a smaller tool for the same job. For instance the jaw capacity of this tool (200 mm long) is equal to that of a 300 mm long adjustable wrench.

T90 Sealed Reversible Ratchets

Top of the Line Ratchets of Ceta Form

SEALED

The ratchet mechanisms of this range are securely sealed into the housing. Therefore there is no possibility of dirt, water or chemicals penetrating into the mechanism - result: dramatically increased life.

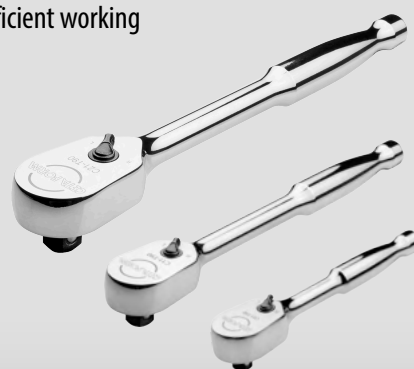

TOUGH

Unlike traditional fine-tooth ratchets, a high number of pawl teeth are engaged to the gear during operation. Result: very high torque levels without tool failure.

90

PRECISE

The 90-tooth gear mechanisms used in this series allow for 4° ratchet angle. This aids efficient working particularly in restricted areas.

New Compact Set Boxes

Engineered for the highest possible number of tools in most compact dimensions. Ideal for field technicians, mechanics and engineers.

DURABLE

Manufactured from premium quality materials. The integrated soft areas help absorb impacts protecting the box itself and the contents.

VERSATILE

Two different box dimensions and a large number of set options offered within these boxes.

SECURE

The tools are securely placed into their slots either within a foam module or a plastic insert.

High Leverage Pliers and Cutters

Easier cutting thanks to optimised leverage

SMART

Dramatically less cutting effort required compared to traditional pliers thanks to the placement of the joint area close the cutting edge.

DURABLE

Premium quality German steel from Solingen coupled with the machining and heat treatment know-how of Ceta Form ensures long years of tool life.

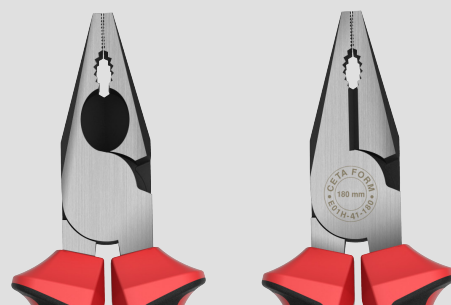

ERGONOMIC

The well-known Ceta Form ergonomics is self-evident also in this new series. Hours of fatigue-free use is possible.

GT-MAX Roller Cabinets

The ultimate in tool storage

We believe the ultimate in hand tools deserves the ultimate in tool storage. Therefore after endless hours, weeks and months of research and many user interviews we have developed the new GT-MAX roller cabinet series.

This range addresses even the most diverse user needs in the typical Ceta Form cabinet build quality. As you flip through the catalogue, you will see a lot of variants for different user profiles. The cabinets can also be fitted with a selection of CFS tool modules larger than ever (pages 43 – 57) and a range of accessories (pages 29 – 30).

Experience the new dimension in tool storage by yourself.

SAFE

Three-staged locking system prevents tilting, unintentional opening of drawers and secures the tools.

CETA FORM Tool Modules

Traceability and efficiency at its best

Today's complex MRO and manufacturing environments require intelligent tool storage systems. Particularly in aerospace and automotive industries, this necessity is even higher.

The Ceta Form Foam System (CFS) addresses these requirements in a perfect way. It ensures that no tool is left where it may pose a security risk. Therefore the highest degree of traceability and efficiency is guaranteed.

Get organized and have full control over your tools with CFS tool modules.

CETA FORM Wrenches

Precise, Tough and Elegant

100%

PRECISE

All Ceta Form wrenches are broached to very tight tolerances. In the later stages of production, necessary efforts are given to ensure that these original tolerances are kept. Therefore either open-end or ring, all wrenches tightly fit the fasteners.

VERSATILE

From open-end to ring-end, E-TORX to flare nut, metric to imperial a large range of variants are available throughout our wrenches range. You will find what you are looking for.

TOUGH

Only premium quality, crack-controlled steel is used during the forging. Coupled with the deep heat treatment know-how of Ceta Form, all Ceta Form wrenches are guaranteed to withstand against higher torques than the DIN.

Most Ceta Form wrench sets are offered in new high quality tetron pouches

C GEAR Wrenches

Ideal for working in confined spaces, C-Gear wrenches enable the user to work on a nut/bolt without removing the tool to reposition it.

B05 Series

The standard model. A compact ratchet spanner combined with an open-ended spanner.

B06 Series

The flexible model. For even more confined spaces, the pivoting flexible ring end allows for 90° operation.

Combination Wrenches

B01 Series

02 Wrenches and Hex Keys

B21W Series New Adjustable Wrenches

Professional quality adjustable wrenches with extra wide jaw opening

SLIM

The slim and tapering design of the jaws makes it very easy to access restricted areas. Thanks to the premium material selection, the jaws are still very durable despite compact dimensions.

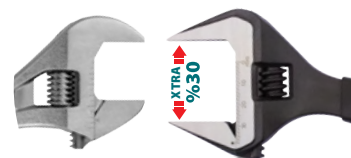

ERGONOMIC

The softgrip ergonomic handle allows for a good grip and ensures fatigue free working for long hours.

EXTRA-WIDE

Extra-wide opening capacity makes it possible to work with a smaller tool for the same job. For instance the jaw capacity of this tool (200 mm long) is equal to that of a 300 mm long adjustable wrench.

200 mm - 8"

B21 Series Adjustable Wrenches

- Adjustable jaw set at 15° for easy repositioning
- Ergonomic design for easy handling
- mm scaled
- High alloy tool steel

CETA FORM®

Sockets and Accessories

03 Sockets and Accessories

Ceta Form Ratchet Handles

90-TOOTH **T90**

High number of teeth yet high torsional strength thanks to a high number of pawl teeth in engagement with gear. Sealed against dust, dirt and water. Arguably the top ratchet in our range.

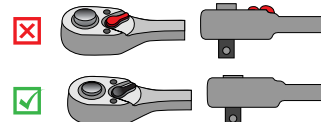

60-TOOTH **COMPACT DESIGN**

Similar mechanism to T90 series with a smaller number of teeth. Ideal for working in confined spaces due to slim head design. Quick release button.

48-TOOTH **HIGH TORQUE**

Solid, tried and tested Gear-to-Gear mechanism ensuring higher torque levels and long tool life. Quick release button.

Switch pawls on Ceta Form ratchet handles are placed in a recessed area. Unnecessary contact to the switching pawl is avoided (except T90 series).

Multi-FiX

Socket Range

The ideal all-rounder system for working on metric hexagon, SAE hexagon, TORX, square and spline fixings. Hollow sockets ideal also for protruding bolts.

- Hardened and tempered 31CrV3 steel
- Mirror polished chrome finish for corrosion resistance
- Thin wall and arch design can increase driving torque by up to 40%.

Multi-purpose socket wrenches fit all the bolts.

Torque Wrenches

04 Torque Wrenches

Exacto Torque Wrenches

Torque-controlled tightening is now essential in many sectors including automotive, aviation, energy etc. Our range of tools dedicated to torque controlled tightening precisely addresses the requirements of professionals in these industries.

All Ceta Form torque tools are factory calibrated according to standards and an individual serial numbered calibration certificate is provided.

Accuracy according to:
DIN ISO 6789 & ASME B107.14M-2004.

EXTENSIONS & ADAPTERS

When using an extension or adapter (increasing the effective length of the torque wrench) the output torque value will change. To calculate the new torque output of the wrench use the following formula

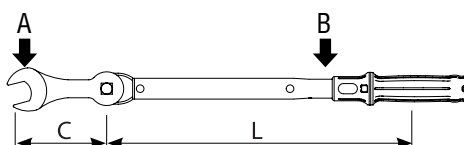

$$A = \frac{L + C}{L} \times B$$

A= Torque exerted at end of adapter

L= Distance between square drive and hand position

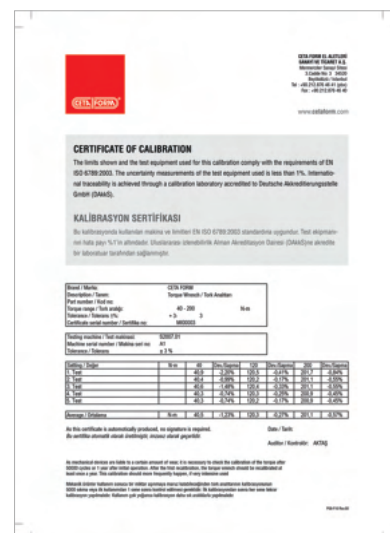

B= Wrench scale reading

C= Length of adapter or extension

A number of variables including the length of the adapter or extension, length of the wrench and variations in hand position on the wrench will affect the accuracy of the above calculation.

Individual calibration certificate

Torsion Bits

Sudden torque peaks particularly during screwdriving applications on metals and hard materials cause premature bit breakage. A tough but flexible bit with a torsion zone is the answer for such applications: Ceta Form Torsion Bits.

Optimized Torsion zone both in E6.3 and C6.3 profiles. Provides resistance to torsional stress and ultimately longer life time.

Pliers and Cutters

06 Pliers and Cutters

High Leverage Pliers Programme

Easier cutting thanks to optimised leverage

SMART

Dramatically less cutting effort required compared to traditional pliers thanks to the placement of the joint area close the cutting edge.

DURABLE

Premium quality German steel from Solingen coupled with the machining and heat treatment know-how of Ceta Form ensures long years of tool life.

ERGONOMIC

The well-known Ceta Form ergonomics is self-evident also in this new series. Hours of fatigue-free use is possible.

Cordless Work Lamps

Today's complex vehicles and machineries often challenge the mechanics with respect to lighting needs. The challenge is even harder when working in areas with no power supply. Ceta Form's LuMAX family of work lamps is the ideal partner for such occasions.

Unique powerful and completely uniform illumination are the built-in characteristics of all lamps in this family.

The Ceta Form Guarantee

Ceta Form offers a total quality guarantee for its tools against defects in material or workmanship. This guarantee covers the free repair or replacement of the faulty tool.

This guarantee is not valid for tools which have been misused or abused. A tool's normal wear and tear in the expected reasonable lifetime is also exempt from guarantee.

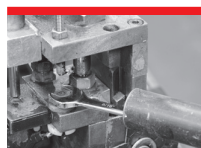

Exceptions of the Ceta Form Guarantee

Tool cabinets, tool cases, torque wrenches, tape measures, utility knives, lighting equipment, cutting tools and wire brushes are covered by a 2 year warranty against failures due to production defects.

Consumable items such as bits, hole saws, files, utility knife blades, hacksaw blades, jigsaw blades, plastic hammer heads and hand riveter spares are covered by a limited warranty only. This warranty is valid if the product is unusable when it is in new condition due to a possible production defect.

Examples of Improper Use

Compliance to the below mentioned instructions and avoiding misuse will ensure that your tools will serve you without any problems for years. This will also keep our warranties valid. In the event that our tools fail due to the one of the below shown types of misuses, the warranty will be invalid.

Never use extensions on tools unless it is specified that it is appropriate.

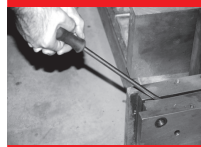

Ring ends of ratcheting combination wrenches should be used for rapid tightening. It is recommended that you use the open end for high torque final tightening.

Torque wrenches signal with a "click" sound when the preset torque is reached. Further application of power after this signal may destroy the ratchet or the spring mechanism.

Never use chromed sockets on impact wrenches. Use only impact sockets which are black coloured on impact wrenches.

Do not use your screwdriver as a lever or a chisel. Avoid exerting excess torque through using the hanging hole as a lever.

Always select the right type of screwdriver or screwdriver bit for the type of screw you are using. Too small or too big a screwdriver/bit compared to the screw may destroy the tool or the screw. Also be careful about the distinction between Phillips and Pozidrive screws.

Do not use pliers and cutters for cutting materials larger than the permissible capacities. Avoid short circuiting when working on live circuits as this may destroy the cutting edges.

Do not use cable shears to cut materials other than copper. Always conform to the cutting capacities when working on copper wires.

Do not use hammers on a material whose hardness is higher than the hammer head (50-58 Hrc).

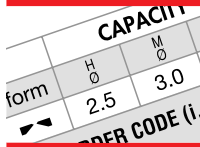

Tape measures should be used as a precision instrument. When being used in construction environment involving building chemicals etc., ensure that the tape is clear when rewinding. Keep away from water and moisture as this might rust the blade.

Do not use tools other than hammers for striking purpose.

Do not alter the sizes and dimensions of your tools.

Please conform to the capacities listed throughout the product tables.

The torque power of ballpoint hex tools is lower compared to normal hex tools. Please use them accordingly.
